

how to track using this poster

This sheet tracks three elements of success; faces, sales, and sharing.

Fill each month from left to right, starting over each new month!

Faces are in the pie-shaped circles (5 faces per circle) and even though parties come in different sizes, you can imagine each circle as a party. To achieve the Sapphire Star, you should aim to book 12 parties and hold 6. Alternatively, you should aim for 30 new faces per month (a 30 faces in 30 days tracking sheet is later in this bundle!)

Sales are listed here as *retail sales*. Color in one \$100 *rectangle* for each \$100 retail sold. The goal for Sapphire Star is \$1800 wholesale/quarter, so that means \$900 retail/quarter. Break that into MONTHS instead of QUARTERS and it looks like \$600 wholesale and \$1200 retail. It's lumped like this so that you can count each *square* (2 x \$100) as a single \$100 wholesale. So selling a Beyond Ultimate Miracle Set at \$208, you'd color in this:

Each time you **share** the opportunity, you fill in a triangle. Try to book 2 shares per party.

Remember... the higher you achieve, the more the prizes compound. A director that personally sells \$10k retail per month earns a Pearl Star prize each quarter PLUS the Pearl All-Star purse PLUS the Queen's court of Sales bracelet, PLUS she probably earns Queens court of Sharing AND she probably drives a career car!

*I pray that these tracking tools bless your business
and motivate your success in the coming Seminar Year*

XO Erin

The figure displays six identical columns, each representing a different instance of the game. Each column contains three elements: a circular spinner at the top, a table in the middle, and a diamond-shaped spinner at the bottom. The spinners are divided into five equal segments. The table in the middle has two rows and two columns, with the top row labeled 'RETAIL SALES' and the bottom row labeled 'SHARE CALLS'. The diamond spinner is divided into two equal halves. The labels 'FACES' and 'SHARE CALLS' are positioned to the left of the spinners, and 'RETAIL SALES' is positioned to the left of the table.

The image shows four geometric shapes arranged in a 2x2 grid. Each shape is divided into two equal halves by a vertical line. The shapes are: a circle, a rectangle, a diamond (rhombus), and another circle, rectangle, and diamond. The shapes are arranged in two rows and two columns. The top row contains a circle and a rectangle. The bottom row contains a diamond and a circle. Each shape is divided into two equal halves by a vertical line.

The figure displays six examples of a data table, each with three rows and six columns. The columns are labeled: **FACES**, **RETAIL SALES**, and **SHARE CALLS**. The first row of each table contains a circular chart with five segments, a table with two rows and one column, and a diamond-shaped chart with a vertical line. The second and third rows contain numerical data for each of these three categories.
